speak, here and there. Of course it causes more or less of a corresponding feeling on the part of a of that community (and it is the same on the part of the more thoughtful Hawanians,) regard this state of things with regret and concern. It becomes us as wise men to investigate this matter. Not from a cowardly fear, but as wise and thoughtful persons obeying the command to

seek peace and pursue it; as those who are responsible for the common good. The history of these islands has been remarkable for the peace that has always prevailed between men of different races. Is there any real or just reason why this should not continue? If there is any such real reason let it be removed. If there is not, then let it be clearly known and shown that there is no reason for disaffection. Thus shall those who are in the right be sure of that right and be prepared as true men and women to stand by the right, and so shall the side that is wrong have no plea of ignorance or misapprehension to defend their actions.

This is no new thing. Fifty years ago the natives were made to believe that an upright and just man was digging a cellar under his house, (the house now occupied by Mrs. A. S. Cooke) as a storehouse for implements of war to be used in subverting the kingdom of that day. From that time to this, every now and then, one class of people have endeavored to excite the fears of others in similar methods. The knowing the situation may not be as serious as some apprehend.

Two causes seem to work in eausing a feeling of dislike to foreigners. One, is the feeling that somehow or other the foreigner is responsible for the diminution of the race. The second cause is the feeling that foreigners resident here, and Hawaiian-born white men are joining their efforts to those of foreign governments to enable those foreign governments, and America in particular, to obtain either a part or a whole of the Hawaiian territory for themselves.

Before taking up either of these subjects it will be well to touch upon a question of rights. Have white men, or foreigners of any kind, a right to settle here, or do they live here only by sufferance? by the consent implied if not expressed of Stirps for a Royal Family; and the succession from the Sover-eign thus elected, shall be regulated by the same law as the present Royal Family of Hawaii. 6. That Articles 50, 51, 53, 54, and 55 be amended by strik- of foreigners, born on the islands any more right, as a matter of equity, to their homes and position here than those who have settled here from

When the American missionaries came here in 1820, they asked leave of the King and chiefs to remain. It was fitting that they should for two reasons. First, they were aware that their success as missionaries would involve great changes in the whole system of society and government. A second reason was that the land by the theory of that time belonged to the King, and as a matter of course the consent of the King was the only peaceful method of acquiring a place of

The same state of things does not exist now. Among civilized nations it is held to be a right belonging to all men to settle in what part of the world they choose. When Hawaii made for herself laws, and published and enforced them, and foreign governments assented that their citizens residing here should be amenable to those laws, then Hawaii entered the union of nations. The President of the United States in 1829 sent to the chiefs of these islands a declaration to that effect, viz. that American citizens should be so amenable, and from that time Hawaii truly should rank her independence as a nation.

on these islands. It is understood of course that those coming in shall obey the laws of the country. In addition to the laws of a country, there are its traditions and customs. When a stranger interferes with these by physical force or material means, there exists reason for using the same means for expelling him, but where he uses moral means, argument, speech, moral influence, is it not right that freedom of speech should be granted. Else how should the world grow better? It is only ignorant and bigoted communities that deny this.

There is no law, and no natural right of any other person, that prevents me from selling my lot to an Arab, or to a Chinaman, if you deem that more likely. My next neighbor may do the same, and if 5,000 rich Chinamen choose to come in and buy two thirds of the town of Honolulu, there can be no reason urged for preventing them, save the refusal to sell at any price on the part of present owners. Do you say that this exposes a small community to the risk of being bought out generally; to the risk of having 5,000 Mormons come down here with bags of gold to possess the land? system.
